

# *"The Magic of Makeover"*

## Dr. Salzberg's Myths of Dentistry

### Dental Myth #8

## Dental Offices Don't Care About People, Just Profits

My staff and I would like to thank the readers of Suburban Woman for the past year. We've received lots of calls and met so many wonderful new patients.

We have new patients that just can't stop smiling with their new veneers and lots of lost (missing) teeth that have now been replaced with bridges and implants. We also started orthodontics on patients of all ages, who never thought it could be so easy. Orthodontics today is not the orthodontics of the past. It's faster than ever before. The fear and pain are gone. The new children we've met love us and our big stuffed toy treasure chest.

Patients love to remove all their silver fillings and replace them with tooth colored fillings. Now when they smile it looks like they never had a cavity.

One of our many patients that came to us from Suburban Woman, is Lana. She had large spaces between her teeth. She was really self-conscious about smiling. Now we can't get her to stop. She is so happy and so are we. She now sends us friends, family and every one she meets. See her wonderful before and after pictures. We call it "The Magic Of Makeovers".

"My only regret is that I waited this long to fix my smile. Now I feel so much younger and love what I see when I look into the mirror every morning. I just know that 2007 will be the best year ever!"
